OBJECTIVE

Aiming for a role that enables application of strong skills and abilities. Looking forward to fuel organization's growth and advance professional development.

SKILLS

- Programming Language: Java, Python
- Frontend: HTML, CSS, JavaScript
- Database: SQL

PROJECTS

Interactive Data Structures Explorer 2024

- Developed a Java-based application using Swing to visualize and interact with various data structures. The project includes implementations of arrays, linked lists, stacks, queues allowing users to perform operations like insertion, deletion, and traversal. The Swing-based GUI provides real-time visualization and step-by-step operation breakdowns to enhance understanding. Emphasized modular design for scalability and maintainability, combining algorithmic concepts with intuitive visualization for educational and practical learning.

Online Grocery Booking Page 2023

- Developed a responsive online grocery booking page using HTML, CSS, and JavaScript. Features include product listings, search functionality, and a dynamic cart system. Ensured seamless user experience, cross-browser compatibility, and clean front-end design.
